

New Features: Campaign Manager

- Duplicate job names no longer permitted
- Added ability to delete a job
- Additional options when searching a product
- Additional permission list options
- Job Specific Data
- Static menu handling

NO DUPLICATE JOB NAMES

- A warning message is displayed if you create a job with a name that is already used in the Campaign. All job names in a Campaign must be unique.

DELETING JOBS

- Jobs within a Job Group are now able to be deleted. A warning is displayed confirming that the products will be removed and job specific images will be reset to their original settings. Note: Products are only removed from the Job not the Product Bucket.

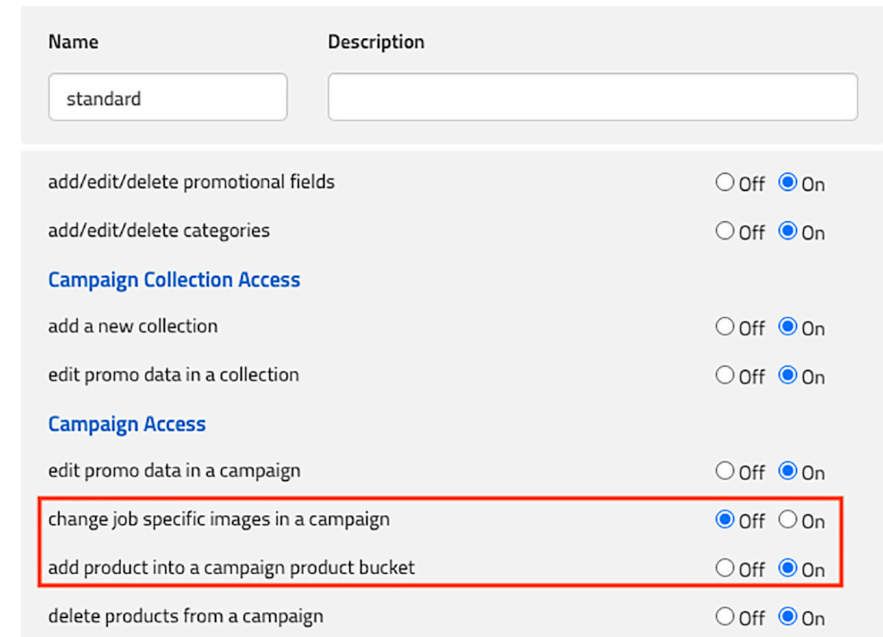

ADDITIONAL SEARCH CRITERIA

- When searching for a Product in the Product Bucket or a Job, now has the option for 'contains' as well as 'is' for a direct match.

ADDITIONAL PERMISSION LIST OPTIONS

- Refined Campaign Access further - separating the ability to change job specific images and adding product to a campaign.

JOB SPECIFIC DATA

- Job Specific Fields will show with a red Job Specific Data icon . The altered field value is indicated by the red *
If the icon is black it means it has no job specific data. ie: it is using the master promotional data
