

New Features: Asset Manager

- Ability to bulk delete Collections
- Fixed issue with exporting using Safari. Now exports as a Zip file

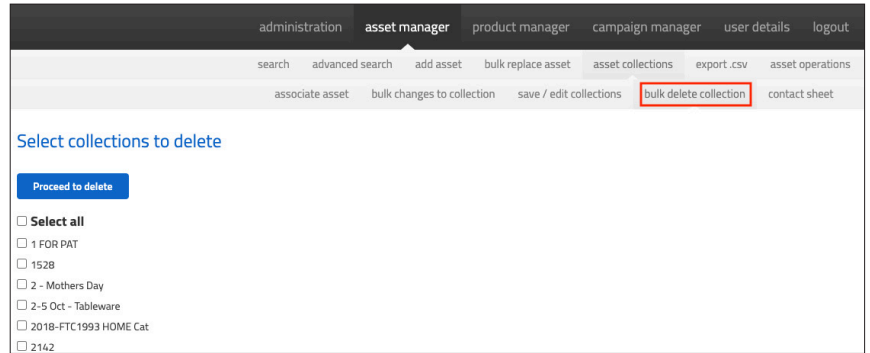

New Features: Product Manager

- Added Export function on search results
- Update function now allows you to change Category via CSV

Asset Manager

Ability to bulk delete collections

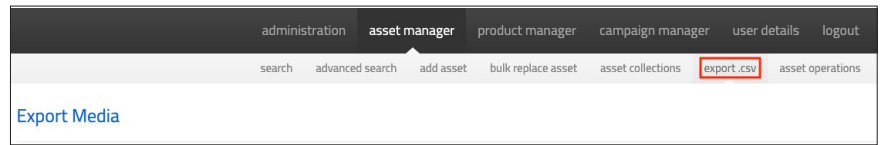

- New submenu allowing you to delete specific or all saved collections.

Asset Manager

Export.CSV function.

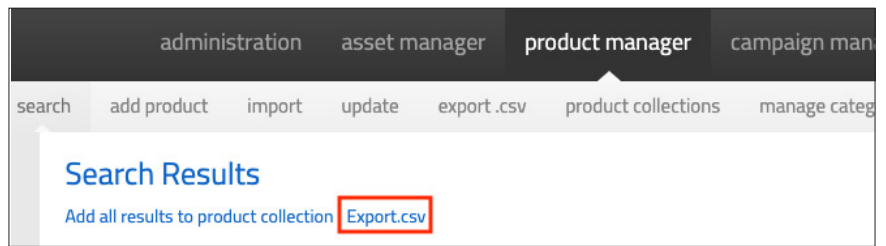

- Fixed issue with export in Safari generating a window rather than a file.
- Now generates a zip file first.

Product Manager

Export function from search results

- Search results can now be exported directly from a search result, without needing to add to a product collection first.

Product Manager

Improved Update function

- Expanded explanation for update function. Now have the ability to remap product to a different category.
- To change category, the category field must be selected when mapping. Category is not mapped as the default.
